

Product Information

OxyTech™

Advanced Oxygen Technology

OxyTech is a uniquely formulated colon conditioner which is fast acting and is scientifically designed to work gently, safely and effectively without bulky fibre, chalky taste or harsh side-effects.

For candida, bloated stomach, irritable bowel, leaky-gut, skin disorder, continuous constipation or diarrhoea and lack of oxygen and energy.

It breaks debris in the colon into very small pieces that can be easily and gently eliminated. A clean and healthy colon can lead to more effective absorption of vitamins, minerals and nutrients.

In OxyTech, Ozone (O₃) and Oxygen (O₂) are bonded to magnesium. When the OxyTech capsules are ingested with water in the stomach, the bonding between the magnesium and the oxygen molecules is cleaved and the oxygen is absorbed by the blood, lymph and cellular fluids very quickly.

Ingredients	per 2 capsules
Ascorbic Acid	150 mg
Bioflavonoid complex	50 mg
Elemental Magnesium	380 mg
Vitamin C	75 mg
Sodium	60 mg

The capsule shells are of plant origin and therefore suitable for vegans and vegetarians, as they contain no animal ingredients.

Questions often asked:

How long can I take OxyTech?

“One should never advise people to take any supplement forever. I have taken on average 4 OxyTech capsules for about 20 years and could not do without them to regulate my digestive system and give me more energy” Rolf Gordon

Could the Magnesium in the OxyTech be too much for me?

Magnesium is vital to enable your body to function properly and is very good for you. The majority of the Magnesium is used up creating the oxygen. OxyTech is perfect for getting a good “flow” through your colon and in the process releases any debris in the colon collected over the years.

Can I take OxyTech with such and such medicine, antibiotics, steroids, homoeopathic remedies etc.?

We jokingly say ‘can you breathe when you take these medicines etc.?’ It can be taken with everything and is particularly good if you take antibiotics, which may damage some good digestive bacteria that love OxyTech.

How does OxyTech compare with a Colonic Irrigation and Coffee Enemas?

OxyTech will not only benefit your complete digestive system, but will also give the whole of your body more oxygen on a continuous basis. A Colonic Irrigation will clean out you colon. Coffee Enemas are supposed to clean out your whole body, but both methods are cumbersome to carry out and need to be administered on regular basis.

Is OxyTech a Laxative?

Laxatives irritate your bowels to make them forcefully expel. They are habit forming and they stretch and expand your colon unnecessarily. On the contrary, OxyTech regenerates your colon lining, so that it functions normally.

Can children take OxyTech?

It is ideal for children at any age who are constipated or are taking antibiotics. If the child is too small to swallow capsules, the contents from a capsule can be spread on food, mixed in a smoothie, or taken with a drink they can tolerate.

If I get food poisoning?

Take a large dose of OxyTech (say up to 10 capsules) as soon as possible.

How do I deal with constipation?

Increase the nightly dose of OxyTech until constipation has been solved, then bring dosage back to a maintenance dose, this keeps your system regular.

Will OxyTech help with my candida and/or other digestive problems?

One of the main causes of candida is the frequent and prolonged intake of antibiotics, both direct and indirect through the food chain from antibiotics given to farm animals or from you taking steroids such as cortisone and the contraceptive pill.

My baby has colic?

If you are breast feeding, you can take OxyTech to regulate your body. If bottle feeding give baby OxyTech powder by teaspoon mixed with something they can tolerate.

The Importance of Oxygen

Of all the chemical elements, oxygen is the most vital to the human body. We would survive for only minutes without oxygen. Oxygen is the life-giving, life-sustaining element. Approximately 90% of the body's energy is created by oxygen. Nearly all of the body's activities, from brain function to elimination, are regulated by oxygen.

The only way to truly optimise health is to ensure complete cellular oxygenation. Every one of the body's trillions of cells demands oxygen for proper function. Oxygen starvation at cellular level (hypoxia) is the underlying cause of most serious illness.

This oxygen-energy cycle has become critically important today, more than at any time in human history, because of the unnatural decrease in atmospheric oxygen.

There are many causes for this decrease in atmospheric oxygen such as deforestation, auto and industrial pollution, devitalised soil, volcanic eruptions and so on. It has been estimated that the air breathed by our distant ancestors contained approximately 50% oxygen. Two hundred years ago, the air was composed of 38% oxygen and 1% carbon dioxide. The level measured by Swiss scientists in 1945-1946 was 22%. They have been carefully monitoring it ever since. The most recent measurement was 19% with more than 25% carbon dioxide. In our major cities the oxygen level can be lower than 10%!

It is clearly of the utmost importance that we begin to significantly increase our intake of oxygen.

Instructions on how to take OxyTech

These are guidelines, as we are all different and it is up to you to determine what is the correct number of capsules for you to take. When taking the capsules, some people experience false diarrhoea, as their colon cleanses. This is nothing to worry about and is, in fact, a sign that the capsules are working and cleaning your digestive tract.

It's important that you make sure you drink plenty of water.

Take the capsules one hour after your last meal. Taking the capsules very late in the evening may interfere with your sleep.

Initially take one capsule in the evening. Increase the dosage by one capsule every evening, to as many capsules needed to solve your digestion problem. Stay at this level for about 10 days.

Daily maintenance after achieving desired results: take between one and six capsules daily, whatever suits you without being constipated or having diarrhoea.

Some very sensitive people may only be able to start with 1 capsule and build dose up by 1 capsule extended over a period. Please do not give up, because if you are very sensitive you are the one, which most need OxyTech. Even if one capsule is too much start taking the OxyTech capsules with meals.

More energy: OxyTech has shown to increase the oxygen in your blood within ten minutes of taking the capsules. This is why many people feel that they have more energy after taking OxyTech on a regular basis.

Diarrhoea: In most cases, OxyTech deals with diarrhoea very quickly.

If you feel a cold coming on, the disturbance can literally be blasted out of your system by taking OxyTech. The worst that will happen is that you may get loose stools for a short while, but cold, flu or whatever will often just disappear.

Testimonials

"OxyTech has successfully cleared my daughter's Candida". Mr. K. M. Yorkshire

"I've been taking OxyTech since 2001 and it has solved all my gut problems" Mrs. S.M. North Yorkshire

"I have been constipated for years. Everything I have tried before has stopped working after a while. OxyTech keeps on working" Mrs. P. W. Bucks

"My stomach bloating stopped as soon as I started taking OxyTech" R.D.G. Kent

"I stopped taking OxyTech, but my energy plummeted again, so I'm back on OxyTech" Practitioner in Midlands

"A week after starting OxyTech I gave blood and the nurse remarked: 'your blood is very well oxygenated'" S.D.K. London

"My skin disorder, which I've had for almost 25 years, disappeared as soon as I started taking OxyTech" C.C.P. USA

"Before I started taking OxyTech I had been constipated for 20 years" P.J. Scotland

"Your OxyTech has been very helpful in purifying and stabilising my stomach. My doctor told me I had several chronic stomach diseases and that I would need to take prescriptive medicine for life. Now I only take OxyTech and I am getting better!" D.N. Denmark

"After trying many remedies over a long period OxyTech at last got rid of my Candida" J.S.J. South Wales

"It's the first time in weeks that I've had any relief from constipation!" P.L. Edmonton

"I have had Candida and a leaky gut for a long time. I've tried many types of medicines and herbs etc. without any success. Since I have been on OxyTech, I have not had any digestive problems." Mrs. W.B. Kent

"The Oxygen Therapy is going great!" Mrs J.M.

Full money back Guarantee

If you feel that you have not benefited from taking 150 OxyTech capsules, you can return the balance for a full refund.
