

## Product Information

# OxyTech™

## Advanced Oxygen Technology

**OxyTech** is a uniquely formulated colon conditioner which is fast acting and is scientifically designed to work gently, safely and effectively without bulky fibre, chalky taste or harsh side-effects.

*For candida, bloated stomach, irritable bowel, leaky-gut, skin disorder, continuous constipation or diarrhoea and lack of oxygen and energy.*

It breaks debris in the colon into very small pieces that can be easily and gently eliminated. A clean and healthy colon can lead to more effective absorption of vitamins, minerals and nutrients.

In **OxyTech**, Ozone (O<sub>3</sub>) and Oxygen (O<sub>2</sub>) are bonded to magnesium. When the **OxyTech** capsules are ingested with water in the stomach, the bonding between the magnesium and the oxygen molecules is cleaved and the oxygen is absorbed by the blood, lymph and cellular fluids very quickly. (see over for more details)

## Questions often asked:

### How long can I take OxyTech?

*“One should never advise people to take any supplement forever. I have taken on average 4 **OxyTech** Capsules for about 20 years and could not do without them to regulate my digestive system and give me more energy” Rolf Gordon*

### Could the Magnesium in the OxyTech be too much for me?

Magnesium is vital to enable your body to function properly and is very good for you. The majority of the Magnesium is used up creating the oxygen. **OxyTech** is perfect for getting a good “flow” through your colon and in the process releases any debris in the colon collected over the years.

### Can I take OxyTech with such and such medicine, antibiotics, steroids, homoeopathic remedies etc.?

We jokingly say ‘*can you breathe when you take these medicines etc.?*’ It can be taken with everything and is particularly good if you take antibiotics, which may damage some good digestive bacteria that love **OxyTech**.

### How does OxyTech compare with a Colonic Irrigation and Coffee Enemas?

**OxyTech** will not only benefit your complete digestive system, but will also give the whole of your body more oxygen on a continuous basis. A Colonic Irrigation will clean out you colon. Coffee Enemas are supposed to clean out your whole body, but both methods are cumbersome to carry out and need to be administered on regular basis.

### Is OxyTech a Laxative?

Laxatives irritate your bowels to make them forcefully expel. They are habit forming and they stretch and expand your colon unnecessarily. On the contrary, **OxyTech** regenerates your colon lining, so that it functions normally.

### Can children take OxyTech?

It is ideal for children at any age who are constipated or are taking antibiotics. If the child is too small to swallow capsules, the contents from a capsule can be spread on food, mixed in a smoothie, or taken with a drink they can tolerate.

### If I get food poisoning?

Take a large dose of **OxyTech** (say up to 10 capsules) as soon as possible.

### How do I deal with constipation?

Increase the nightly dose of **OxyTech** until constipation has been solved, then bring dosage back to a maintenance dose, this keeps your system regular.

### Will OxyTech help with my candida and/or other digestive problems?

One of the main causes of candida is the frequent and prolonged intake of antibiotics, both direct and indirect through the food chain from antibiotics given to farm animals or from you taking steroids such as cortisone and the contraceptive pill.

### My baby has colic?

If you are breast feeding, you can take **OxyTech** to regulate your body. If bottle feeding give baby **OxyTech** powder by teaspoon mixed with something they can tolerate.

## Instructions on how to take OxyTech

These are guidelines, as we are all different and it is up to you to determine what is the correct number of capsules for you to take. When taking the capsules, some people experience false diarrhoea, as their colon cleanses. This is nothing to worry about and is, in fact, a sign that the capsules are working and cleaning your digestive tract.

### It's important that you make sure you drink plenty of water.

Take the capsules one hour after your last meal. Taking the capsules very late in the evening may interfere with your sleep.

Initially take one capsule in the evening. Increase the dosage by one capsule every evening, to as many capsules needed to solve your digestion problem. Stay at this level for about 10 days.

**Daily maintenance** after achieving desired results: take between one and six capsules daily, whatever suits you without being constipated or having diarrhoea.

Some very sensitive people may only be able to start with 1 capsule and build dose up by 1 capsule extended over a period. Please do not give up, because if you are very sensitive you are the one, which most need **OxyTech**. Even if one capsule is too much start taking the **OxyTech** capsules with meals.

## More energy

**OxyTech** has shown to increase the oxygen in your blood within ten minutes of taking the capsules. This is why many people feel that they have more energy after taking **OxyTech** on a regular basis.

## Diarrhoea

In most cases, **OxyTech** deals with diarrhoea very quickly.

If you feel a cold coming on, the disturbance can literally be blasted out of your system by taking **OxyTech**. The worst that will happen is that you may get loose stools for a short while, but cold, flu or whatever will often just disappear.

## Full money back Guarantee

If you feel that you have not benefited from taking 150 OxyTech capsules, you can return the balance for a full refund.

### Full details on how it works:

Ozone (O<sub>3</sub>) and oxygen (O<sub>2</sub>) are bonded to the magnesium and blended with a special type of ascorbic acid which forms a 'crystal lattice matrix', this crystalline lattice is sensitive to light, heat and moisture. When the capsules are ingested with water that moisture, along with hydrochloric acid in the stomach, dissolves the lattice matrix releasing the ascorbic acid which then cleaves the bond between the magnesium and the oxygen molecules forming magnesium peroxide. Nothing happens until the magnesium peroxide gets into the colon where the oxygen molecules (O<sub>2</sub> and O<sub>3</sub>) separate from the magnesium and the process of absorption or uptake of oxygen into blood, lymph and cellular fluids begins.

The specialized form of ascorbic acid takes the place of the lemon juice that was needed after drinking homozone powder dissolved in water back in the 1920s ... the 'crystalline lattice matrix' of ascorbic acid is an elegant solution that allows encapsulation.

That's our understanding of how the oxygen is released from the magnesium and how the oxygen etc gets into the blood system.

There is 500 mg of magnesium in a single capsule

The breakdown is:

190 mg elemental magnesium, Mg

310 mg magnesium peroxide, MgO<sub>2</sub>

There is no magnesium oxide present

### Ingredients per 2 capsules

		RDA
Ascorbic Acid	150 mg	167%
Bioflavonoid complex	50 mg	Value not established
Elemental Magnesium	380 mg	95%
Vitamin C	75 mg	100%
Sodium *	60 mg	3%

\* Not Sodium Chloride (Salt)

The capsule shells are of plant origin

Manufactured in the USA. Suitable for vegans and vegetarians, as capsule shells contain no animal ingredients. OxyTech is Kosher.

## ***The Importance of Oxygen***

Of all the chemical elements, oxygen is the most vital to the human body. We would survive for only minutes without oxygen. Oxygen is the life-giving, life-sustaining element. Approximately 90% of the body's energy is created by oxygen. Nearly all of the body's activities, from brain function to elimination, are regulated by oxygen.

The only way to truly optimise health is to ensure complete cellular oxygenation. Every one of the body's trillions of cells demands oxygen for proper function. Oxygen starvation at cellular level (hypoxia) is the underlying cause of most serious illness.

This oxygen-energy cycle has become critically important today, more than at any time in human history, because of the unnatural decrease in atmospheric oxygen.

There are many causes for this decrease in atmospheric oxygen such as deforestation, auto and industrial pollution, devitalised soil, volcanic eruptions and so on. It has been estimated that the air breathed by our distant ancestors contained approximately 50% oxygen. Two hundred years ago, the air was composed of 38% oxygen and 1% carbon dioxide. The level measured by Swiss scientists in 1945-1946 was 22%. They have been carefully monitoring it ever since. The most recent measurement was 19% with more than 25% carbon dioxide. In our major cities the oxygen level can be lower than 10%!

## ***Detoxification Programme***

It is clearly of the utmost importance that we begin to significantly increase our intake of oxygen.

As with any detoxification programme, ***when taking OxyTech It's important that you make sure you drink plenty of water.***

Two or more litres per day of water and/or fruit juices is recommended – without this you may feel tired, get headaches and even have skin disturbances. Neither of these will happen if you drink enough water.

It is worth emphasising that the “activated oxygen” release when you take OxyTech provides a rich, aerobic environment in the intestines and colon that is beneficial to socialised “friendly” bacteria. The liquefied stool, that is a common experience, should not cause alarm - it is in fact, a “false diarrhoea” and no pathological conditions in which beneficial flora are destroyed. Quite the opposite – it benefits the beneficial flora. Two hours after taking large doses of OxyTech should be long enough to be within easy reach of the toilet.

## ***Some of the many OxyTech comments***

***“OxyTech has successfully cleared my daughter's Candida”***. Mr. K M. - Yorkshire

***“I've been taking OxyTech since 2001 and it has solved all my gut problems”*** Mrs. S.M. North

***“I have been constipated for years. Everything I have tried before has stopped working after a while. OxyTech keeps on working”*** P. W. - Bucks

***“My skin disorder, which I've had for almost 25 years, disappeared as soon as I started taking OxyTech”*** C.C.P. USA

***“My stomach bloating stopped as soon as I started taking OxyTech”*** R.D.G. - Kent

***“I stopped taking OxyTech, but my energy plummeted again, so I'm back on OxyTech”*** Practitioner - The Midlands

***“A week after starting OxyTech I gave blood and the nurse remarked: ‘your blood is very well oxygenated’*** S.D.K. - London

***“Before I started taking OxyTech I had been constipated for 20 years”*** P.J. - Scotland

***“OxyTech has been very helpful in purifying and stabilising my stomach. My doctor told me I had several chronic stomach diseases and that I would need to take prescriptive medicine for life. Now I only take OxyTech and I am getting better!”***  
D.N. - Denmark

***“After trying many remedies over a long period OxyTech at last got rid of my Candida”*** J.S.J.

***“It's the first time in weeks that I've had any relief from constipation!”*** P.L. - Edmonton

***“I have had Candida and a leaky gut for a long time. I've tried many types of medicines and herbs etc. without any success. Since I have***

***been on OxyTech, I have not had any digestive problems”*** Mrs. W.B. - Kent

***“The Oxygen Therapy is going great!”*** Mrs J.M.

***“OxyTech has helped greatly in clearing the rashes on my skin, constipation, bloating and I have a new revived lease of energy. This has also contributed to my weight loss and I now feel purified”.***

Mrs M.M.S. - Bristol.

***“When I turned 40 I started to get blemishes that I was told were hormonal. More recently, I started taking a natural supplement called OxyTech to help with long-standing digestive issues. Little did I know it would sort my spots too. Proof positive that the state of our skin is reflective of the state of what lies beneath”*** Anna Murphy, Fashion Director, The Times.

## Comments from our website

***"I have two patients using OxyTech, and both have tried going without, and both have come back to it as the best supplement for preventing the worst of diarrhoea and constipation. Both clients who use this say it's the only thing that keeps them regular"***

S.G Roberts - Practitioner

***"Brilliant product which has changed my life! I have had a very lazy bowel for decades, having to resort to laxatives and suppositories – neither of which are ideal. It took a week to work out how many OxyTech tablets I needed to take but once I established what was working I am delighted to say I have a very regular bowel habit. It feels so good"*** Jacqui M

***"Does what it says on the tin"*** Richard R.

***"I have always had problems with constipation. To the point that I have had to have medication that is given just before a bowel operation. And it still hasn't worked. The doctors say I have just got a lazy bowel. I thought I would try OxyTech and see if it truly works"*** P. Ward

***"I find these excellent for keeping my bowels regular and they seem to help me sleep more soundly too when taken at night"*** Fiona W.

***"I can't survive without OxyTech it is like breathing. I suffered with gastric problems from childhood having been abroad and suffering from amoebic dysentary to chronic constipation. I found OxyTech ten years ago, so swear by it. Dulwich products are a magic wand"*** Jennifer C.

***"OxyTech is an amazing supplement that helps remedy colon related issues"*** Torquil

***"This product is invaluable for digestive issues. Even small children as young as 7 can safely take them as a mini detox, with brilliant results! Everyone to whom I have recommended this product have returned time and time again for more. What more do you need?"*** Lorraine R.

***"OxyTech is a great product which keeps me regular. Before using it I suffered from constipation badly also have diverticulitis so OxyTech is brilliant at keeping me regular. Staff are also great and orders arrive safely and promptly"*** Mrs J. Chapman

***"This is the best product I have ever tried I have loads of energy since taking them, and losing weight, going to order more this has changed my life"*** C. Cope

***"I have been taking OxyTech daily for many years and my lifelong problems with constipation have disappeared. Thank you very much Dulwich Health"*** Kathryn

***"These capsules really suit me, they aid digestion and I now don't experience the awful bloating symptoms I used to"*** H. Rosenthal

***"A very happy stomach and a very happy customer"*** Hans

***"I wouldn't be without these OxyTech now having suffered with a sluggish bowel for the best part of my life. I am 78 years old and have used them for a number of years and just take one capsule a day. My husband also uses OxyTech and he takes up to 6 daily. We are both very pleased with your product"*** Marion

***"OxyTech has revolutionised my life, it goes everywhere with me. After suffering from severe Candida for a couple of years, since using it, I have more energy, and Candida free, eating a normal healthy diet"*** J. Sweeting

***"Taking OxyTech has transformed my IBS. I am never without it"*** Bella

***"After trying many remedies over a long period OxyTech at last got rid of my Candida"*** Joanna

***"This is the best product I have found for ensuring gut health"*** A. Ormiston

***"Don't know what I'd do without it"*** Anonymous

***"I have taken OxyTech for years 6 caps at night and they have completely helped digestion issues"*** L C.

***"An excellent product especially if you have occasional bowel stasis"*** John A.

***"I Couldn't live without OxyTech. A brilliant product"*** Catherine

***"Keeps the system ticking over especially if you've neglected it in way of diet etc."*** Kim Osborne

***"I find this product very helpful. Three capsules a day, one hour after my evening meal, keep my bowels regular and banish any signs of constipation. Why would anyone take laxatives when there is OxyTech? It's a much kinder and more natural alternative with numerous other benefits"*** Deborah

***"This is an excellent product, and is helping someone who suffers from IBS"*** R. Cooper

***"Used it for years and it's a lifesaver"*** Anonymous
